AGRI-ENVIRONMENTAL ECONOMICS AND POLICY SEMINAR

Ecological-Economic Policy Modelling Research Group (420d)

This seminar provides a platform for presenting and discussing current research at the interface of agriculture, environment, and economics. It brings together practitioners, researchers, and students interested in agri-environmental policy analysis, ecological-economic modelling, and sustainability transformations in agriculture and food systems. Sessions typically consist of a presentation in English (20–30 minutes) followed by discussion. The seminar offers insights into methodological innovations, current policy affairs and applied case studies.

27.10.2025

Dr. Christian Grovermann

Forschungsinstitut für biologischen Landbau (FiBL)

Using Impact Evaluation to Support Organic and Agroecological Transitions

03.11.2025

Dr. Franziska Appel

Leibniz-Institut für Agrarentwicklung in Transformationsökonomien (IAMO)

Bridging Knowledge and Action: AI and Participation for Agricultural Climate Solutions

10.11.2025

Dr. Benjamin Bodirsky

Potsdam-Institut für Klimafolgenforschung (PIK)

Nitrogen - too much of a good thing. Modeling approaches and policy discussion

17.11.2025

Valentin Schlecht

Universität Hohenheim

Regionalizing biodiversity impacts from food consumption – linking trade data with LCIA models

01.12.2025

Wolfgang Reimer

Regierungspräsident Stuttgart a.D., Vorsitzender der Agrarsozialen Gesellschaft e.V.

Wird die Agrar- und Ernährungspolitik den aktuellen Herausforderungen gerecht?

08.12.2025

Jun.-Prof. Dr. Bartosz Bartkowski

Helmholtz-Zentrum für Umweltforschung (UFZ)

Modelling farmers' decision making in multifunctional agricultural landscapes

26.01.2026

Josef Baumert

Universität Bonn

Linking machine learning and economic theory for modeling agricultural land use at field-level
