

KomBioTa SUMMER SCHOOL 2025

Research meets Nature Conservation Practice

Center for Biodiversity and Integrative Taxonomy (KomBioTa)

Is there a need for taxonomists
outside of science?

Which species groups do
you need to know?

What do future students
need to be prepared for?

Where do they have
career prospects?

Photo: University of Hohenheim / Benjamin Sappalla

For three days we want to get to know practical and applied species knowledge.

We will get to know the most important species groups that are relevant for planning activities and learn methods of identification and recording in the field. Afterwards we want to deepen our knowledge in a practical project work, which is based on a planning procedure according to nature conservation law.

In a relaxed atmosphere, we will explore the diverse flora and fauna around the Federsee station from a nature conservation perspective.

During the KomBioTa Summer School **Research meets Nature Conservation Practice**, we will exchange ideas, share the joy of species knowledge outside our own special expertise and various identify career prospects.

Date: **7 – 9 July 2025 (Mon – Wed)**

Location: **Federsee-Station, Bad Buchau ,
Bad Buchau (Zoological Institute,
University of Tübingen)**

Participants: Doctoral candidates in
Baden-Württemberg

Language: German or English, as required

Number of
participants: 12

Registration: **until 31 May 2025**, by email to
kombiotaoffice@uni-hohenheim.de
with the following information:
name, university, study program,
semester.

Costs: 100 € plus food allowance

Join us! We are looking forward to you.
